

Your agent crew

Every scheduled agent working on DeepWell, what each one does, and when it runs. All times are Phoenix time. Every agent uses Sonnet, works on test copies, never touches customer data, and never pushes code. Fixes land in your repo folder (or as a saved patch) for you to push.

How the work moves

Reports feed Harvest, The Loop builds, Judge gates, you push.

Watch crew

Around the clock. They email you when something is wrong.

Sentinel

hourly · :36

Sentry error watch

Only job: reads new and recurring errors in Sentry, sorts out test noise and temporary outages, and builds fixes for real bugs.

Sentry emails sterling@ on real bugs

log: SENTRY_WATCH_LOG

Lighthouse

hourly · :46

Platform & uptime watch

Checks the website, app, health check and help chat respond, then reads Vercel, Stripe, Neon, Resend and Cloudflare for failed deploys, failed payments, limits and bounces. Read-only on every service.

Vercel Stripe Neon Resend

emails sterling@ on incidents

The Loop

One scheduled task, five roles, every hour. Its whole job is making Donovan better.

Harvest

hourly · step 1

Collector

Gathers what Forge, Compass, Sprint, Radar, Sentinel and Lighthouse found, plus open decisions, and hands over only what isn't done yet.

Hunter

hourly · step 2

Pressure tester

Throws 200+ fresh questions at Donovan each hour (slang, typos, nicknames, serials, dates, trick questions) plus help-chat and upload edge cases, on test data only.

Scribe

hourly · step 3

Translator & planner

Turns everything into a short plain-English to-do list ranked by impact, kept in LOOP_BACKLOG.

Builder

hourly · step 4

Implementer

Fixes the top one or two items with general rules (no one-off hacks), writing new test questions before each change.

Judge

hourly · step 5

Gatekeeper

Runs the full 1,704-question exam and every relevant test. Rejects anything that adds a wrong answer or slows Donovan down, then delivers.

emails only for decisions or big wins

Daily and nightly specialists

Deeper single-topic rounds that write reports Harvest picks up.

Forge

nightly · 12:52 am

Donovan engineering round

Bigger Donovan improvements with several engineers and a reviewer. Updates the Donovan scoreboard.

Compass

nightly · 3:37 am

UX & workflow round

Walks the desktop and phone app, counts clicks for everyday tasks, and fixes the worst friction.

Sprint

daily · 1:37 pm

Mobile fluidity round

Keeps the phone app instant on slow phones and weak signal. First job: the slower sheet-

Radar

daily · 5:41 am

Research scout

Reads Reddit, X, AI company blogs, arXiv and GitHub for free ways to make Donovan smarter

open times found on Sept 30.

or cheaper, including Voyage image search.
Flags anything that would cost money.

Herald

daily · 7:30 am PT

Daily briefing

Your existing "Daily Briefing" task, a 24-hour summary. It isn't part of the DeepWell crew and keeps its current name.

Ground rules every agent follows

- Never pushes to GitHub, never runs git in your folder, never reads secret files, never runs SQL on the live database.
- Never uses or sends customer data. Testing uses the fake "golden" test company only.
- Donovan must keep zero wrong answers on the exam; any change that adds one is thrown out.
- Read-only on Stripe, Vercel, Neon, Resend and Cloudflare. Anything that needs a setting changed comes to you as steps.
- Emails go to sterling@deepwelltechnology.com, at most once per issue every 12 hours.
